Diseases of the

COLON & RECTUM

Cumulative Index
Volumes 21-25
1978-1982

Cumulative Index, Volumes 21-25

1978—1982

In each entry, the boldface number is the volume number; it is followed by the page number of the article.

A

Abdomen
  actinomycosis, complication of colonic perforation, **21**:374
  preoperative management of, in evisceration, **25**:249
Abdominal aortic aneurysm, see under Aneurysm(s)
Abdominal-wall hernia, see under Hernia(s)
Abdominoperineal resection
  leiomyosarcoma of rectum, **24**:402
  recurrent cancer following anterior resection, **24**:80
  secondary, for recurrent colorectal cancer, **24**:618
Abscess(es)
  anal
    complicating hematologic diseases, **23**:310
    Crohn's disease, **24**:22
  anorectal, invasive necrotizing infection secondary to, **25**:416
  central, as precursor of anorectal abscess and fistula, **22**:336
  fistulous, anorectal cryptoglandular intermuscular (intersphincteric), **21**:237
  pelvic, **23**:313
    transrectal drainage, **23**:293
  perianal, Fournier's gangrene complicating, **21**:377
  peridiverticular, percutaneous drainage of, followed by primary sigmoidectomy, **25**:53
  supralevator, **24**:456
  supralevator (letter to editor), **24**:493
  surgical management, **22**:566
  testicular, presenting with rectal carcinoma, **25**:731
Abstracts, **21**:82, 141, 212, 387, 454, 536, 645; **22**:68, 139, 206, 279, 361, 440, 509, 578; **23**:61, 129, 206, 285, 368, 449, 524, 612; **24**:61, 141, 223, 327, 412, 495, 578, 666; **25**:79, 179, 280, 394, 510, 624, 742, 843
  Cancergram abstracts related to colorectal cancer (editorial comment), **24**:578
  CEA and cancer of large bowel (editorial), **22**:361
  Crohn's disease (editorial comment), **24**:61; **23**:612
    diagnosis of (editorial), **22**:68
  hepatic arterial infusion for metastatic carcinoma (editorial), **23**:285
  proctocolectomy, revised, for colitis (editorial), **22**:571
  spurious abstract
    (editorial), **21**:81
    final report (editorial), **21**:645
  Words: faex (editorial), **23**:129
Achlorhydria, pheochromocytoma causing WDHA syndrome, **21**:297
Actinomycetoma, masquerading as abdominal neoplasm, **25**:368
Actinomycosis
    abdominal, complication of colonic perforation, **21**:374
    colonic, mimicking carcinoma, **22**:45
Acute phase proteins, increase, and serum glycoproteins, large-bowel cancer, diagnosis and monitoring, **24**:171
Acute suppurative appendicitis, in femoral hernia, **21**:203
Adenocanthoma(s), colonic, **21**:196
Adenocarcinoma(s)
  see also Carcinoma(s)
  ages of patients less than 40 years, series, **21**:169
  appendiceal, **24**:176
    primary, **21**:205
  arising in Crohn's disease, **23**:498
  change in hyperplastic colonic polyps, **22**:152
  of colon
    with focal choriocarcinoma metaplasia, **25**:230
    survival, **24**:636
    in ureterosigmoidostomy patients, **22**:157
  colorectal
    incidence in Nigeria, **23**:559
    metastatic, recurrent, surgical treatment of, **24**:265
    resectable, adjuvant radiation therapy, **24**:247
    resected ovarian recurrence of, **24**:272
    surgical treatment review, **22**:35
  experimental, in rats, **23**:137
  ileal, complication of surgery for ulcerative colitis, **23**:351
  mucinous (signet-cell), **23**:180
    development, in chronic anal fistula, **24**:562
  obstructing left colon, prognostic implications, **24**:454
  perineal fistulas, Crohn's disease and, **24**:639
  polyposis and, of small bowel, and familial colonic polyposis, **24**:478
  primary, metastases to ovary from, mesothelial cysts associated with, **25**:139
  prostatic, rectal involvement, **21**:23
  rectal
    irradiation and surgery in management, **23**:298
    low anterior anastomosis in, EEA stapler in, **25**:364
  and small-bowel carcinoid tumor, concurrent, **25**:375
  superficial spreading, cecal area, **23**:587
  synchronous primary, of colon and rectum, **21**:20
  thyroid, Gardner's syndrome with, **21**:255
Adenoma(s)
  colonic, stereology and growth mechanisms of, **24**:331
  colorectal, estrogen receptor protein in, **25**:348
  duodenal tubulovillous, Gardner's syndrome with, **21**:255
  experimental, in rats, **23**:137
  large-intestine, histogenesis of, in familial polyposis coli and nonpolyposis coli, **25**:446
  microscopic
    and hyperplastic gland in nonpolyposis coli, histogenesis of, **24**:375
    in nonpolyposis coli, **24**:120
  pituitary (chromophobe) and thyroid (follicular), with familial polyposis, **22**:486
  pseudocarcinomatous, **23**:529
  rectal
    villous, excision with stapler (technical notes), **24**:407
    villous, circumferential, management of, **24**:151
  solitary, in juvenile patients, **23**:26
  tubulovillous, rectal composite tumor in, **21**:506
  villous
    of the appendix, **25**:716
    benign, of entire rectum, management, **21**:630

hyponatremia and syncope with, **21**:118
juvenile colonic polyp, **22**:63
rectal
dinner fork as retractor for transanal excision, **21**:534
management, **22**:406
well-differentiated, at anorectal junction, **21**:261
Adenomatosis, colonic, carcinoma *in situ* of vermiform appendix and, **24**:482
Adenomatous polyp, see under Polyp(s)
Adenomyoma(s), gastric, Gardner's syndrome with, **21**:255
Adult Hirschsprung's disease, see under Hirschsprung's disease
Africa, polyps, rectal, in Zeria, Nigeria, **21**:474
Age factors
carcinoma, colorectal, before 40 years of age, **21**:169
wound healing after proctectomy for inflammatory disease, **21**:155
Alcohol, rectal mucosal changes induced by acute ingestion, **21**:329
Allen, Hubert Montgomery (memoirs), **25**:347
Amebiasis, necrotizing amebic colitis, **21**:447
Amebic colitis, see under Colitis
Ameboma(s), leiomyosarcoma synchronous with rectal, **21**:123
American College of Gastroenterology Annual Scientific Meeting and Postgraduate Course (announcement), **25**:574
American Gastroenterological Association, postgraduate course (announcement), **25**:55, 147, 248
American Society of Colon and Rectal Surgeons
77th Annual Convention, preliminary scientific program, **21**:315
78th Annual Convention, preliminary scientific program, **22**:281
79th Annual Convention, preliminary scientific program, **23**:133
79th Annual Meeting, program highlights, **22**:581; **23**:25A
80th Annual Meeting, program highlights, **24**:50
81st Annual Convention, program highlights, **25**:148
influential leaders in (presidential address), **25**:85
Mathews Oration, **21**:469
Presidential Address, **21**:640
American Society for Gastrointestinal Endoscopy, postgraduate course (announcement), **25**:63, 166, 253
Ampicillin
for elective colorectal surgery, whole-gut irrigation versus enema, **24**:592
pseudomembranous colitis associated with, **21**:514
Amyloidosis, secondary to multiple myeloma, **25**:728
Anal canal
anatomic, measurement, **24**:600
cancer, combined therapy, **24**:73
carcinoma of
radiation and chemotherapy, **25**:685
radiation therapy, **25**:778
length, **24**:600
self-inflicted stripping of mucosa of, **25**:245
surgical, measurement of, **24**:600
Anal incontinence (symposium), **25**:90
Anal region, myoblastomas, **21**:413
Analgesia, lidocaine, viscous, in hemorrhoidectomy, **22**:40
Anastomosis(es)
carcinoma recurrence and, surgical treatment of, **24**:265
cecal-sigmoid, for advanced colonic carcinoma, **24**:343
colonic
collagen formation during healing of, **25**:301
telescoping, experimental (dogs) comparison, **22**:111
colorectal
low, leakage, dog study (symposium), **21**:400
low, safety factors (symposium), **21**:399
decompression, rectal-tube, in left colectomy, **21**:94
the EEA stapler in low colorectal, **25**:704
end-to-end
one-layer, of colon and rectum, **25**:113
stapled, **23**:25
transanal procedure, **22**:102
glucagon (intravenous), in end-to-end stapling, **22**:452; **23**:25
hand-sewn, stapled compared with, **21**:636
ileo-anal, **23**:459
advantage of initial transanal mucosal stripping in (technical notes), **25**:170
ileorectal, for inflammatory disease
intestinal, **22**:399
prospective surveillance by rectal biopsy following, **25**:343
invagination, to preserve sphincter function, **21**:188
large bowel, comparative study of synthetic grafts for reinforcement, **25**:517
leakage
following whole-gut irrigation versus enema, in elective colorectal surgery, **24**:592
low anterior proctosigmoidectomy, sump suction and irrigation of presacral space to prevent (symposium), **21**:401
omentum in presacral space used to protect against in low rectal anastomoses (symposium), **21**:405
below peritoneal reflection, dog study (symposium), **21**:400
left colon, end-to-end, stapled (symposium), **24**:231
low anterior
EEA stapler in, **25**:364
effects of high-dose and low-dose preoperative irradiation on, **25**:406
effects of low-dose preoperative irradiation on, **25**:401
mucosal-stripping, initial transanal, advantage of, in ileo-anal pull-through procedures (technical notes), **25**:170
omental pedicle graft, in colonic, **22**:448
polypropylene suture, monofilament, **21**:342
primary
emergency abdominal colectomy with, **24**:1
after left colon resection, **23**:17
rectal
circular stapling devices for, compared, **25**:285
fluid accumulation in presacral space, following, **25**:680
side-to-end, **23**:456
single-layer, of colon and rectum, **25**:113
stapled, **23**:456
in colorectal surgery, **24**:155
end-to-end, glucagon as adjuvant, **23**:25
glucagon (intravenous) as adjunct, **22**:452
and hand-sewn, comparison, **21**:636
kyphoscoliotic patient, **22**:417
low, **24**:437
sump suction and irrigation of presacral space (symposium), **21**:401
suture, polypropylene, monofilament, **21**:342
sutured, stapled compared with, **21**:636
telescoping, experimental (dogs) compared to one-layer, two-layer, and stapled, **22**:111
transanal procedure, **22**:102
Anatomy
anorectum, fistulous abscess and fistula, cryptoglandular intermuscular, **21**:237
fistulous abscess and fistula, anorectal cryptoglandular intermuscular, **21**:237
hedrocele, **21**:107
infarction, colorectal, after resection for abdominal aortic aneurysms, **21**:613
Anesthesia, local, improved technique of, for anorectal surgery (technical notes), **25**:259
Anesthetic solution, local, injection of, into hemorrhoidal bundles following rubber band ligation (technical notes), **25**:62

Aneurysm(s)
aortic, abdominal
colorectal infarction following resection, **21**:613
ruptured, **22**:185
gluteal artery, inferior, embolization in management, **23**:313
ruptured, in primary arteriocolic fistula, **24**:305
Angiography, or sigmoid lesions, with epinephrine and beta receptor blocker, **24**:5
Announcements, **21**:171, 176, 182, 211, 386; **22**:4, 81, 86, 101, 110, 138, 199, 204, 244, 311, 345, 436, 471, 556; **23**:16, 43, 53, 67, 222, 227, 241, 262, 326, 356, 361, 400, 420, 586, 596; **24**:19, 92, 150, 271, 360, 406, 453, 531; **25**:20, 23, 40, 55, 63, 83, 121, 124, 134, 147, 166, 183, 218, 221, 224, 234, 248, 250, 253, 260, 288, 566, 574, 663, 732
Anomaly(ies), congenital, imperforate anus and ectopic orifices in adult patients, **21**:633
Anoplasty for anal stricture, **25**:809
Anorectal motility, quantitative analysis of in Hirschsprung's disease, **24**:422
Anorectal ring, **24**:600
Anorectum
abscess of
invasive necrotizing infection secondary to, **25**:416
surgical management, **22**:566
adenoma, well-differentiated, at anorectal junction, **21**:261
anatomy, sinus and band, **23**:170
benign disease, **23**:470
carcinoma
epidermoid, preoperative care, multidisciplinary approach, **21**:89
irradiation, external plus iridium-192 implant, **23**:145
verrucose squamous-cell, **21**:120
cloagenic carcinoma in homosexual men, **22**:557
condyloma acuminatum, giant, **22**:497
constipation, postoperative, management, **22**:149, 233
ectopic, correction, **23**:306
fistula of, in supralevator abscess, **24**:456
fistulous abscess and fistula, cryptoglandular intermuscular (intersphincteric), **21**:237
injuries, civilian, **22**:17
manometry of, under anesthesia, in children with chronic constipation, **25**:125
melanoma of, **25**:772
malignant, **23**:122
outpatient surgery, **22**:480
physiologic status of, following sphincter-saving resection for carcinoma, **25**:652
reflex following sphincter-saving operations, **23**:320
sloughage following aortic graft replacement, **21**:302
surgery
hemorrhoids (symposium), **23**:211
postgraduate course in (announcement), **25**:23, 124, 221
primary closure after removal, **23**:2
tuberculous ulcer, **23**:54
urinary retention after benign surgery, **23**:470
Anterior proctosigmoidectomy, see under Proctosigmoidectomy
Anterior resection, see under Surgery, resection
Anthraquinones as contributing factor in acquired megacolon, **25**:312
Antibiotics
colitis from, in normal-appearing rectum, **24**:198
neomycin-erythromycin, in prevention of postcolectomy wound infection, **21**:567
parenteral, preoperative in surgical wound infection prophylaxis, **23**:98
perioperative, in colorectal surgery, compared, **25**:309
preoperative
and morbidity associated with colostomy closure, **25**:464
oral and systemic, in colorectal surgery, compared, **25**:309
pseudomembranous colitis
associated with ampicillin and erythromycin, **21**:514
induced by, toxic megacolon secondary to, **25**:478
pseudomembranous enterocolitis and, **24**:445
Antigen(s), carcinoembryonic, see Carcinoembryonic antigen
Antiseptic principle in practice of surgery (Lister), **25**:173
Anus
carcinoma
epidermoid, preoperative care, multidisciplinary approach, **21**:89
in Nigerians, **24**:361
perianal Paget's disease and, **24**:535
squamous cell, combined therapy, **23**:389
complications of in Crohn's disease, **24**:22
condyloma acuminatum, **23**:550
giant, **22**:497
malignant potential, **23**:191
evisceration of small intestine through, **22**:569
fissure
anal sphincteric pressure in, before and after lateral internal sphincterotomy, **25**:198
chronic, internal sphincter in, **25**:525
chronic, subcutaneous lateral internal sphincterotomy, **25**:798
conservative treatment, **21**:582
lateral internal sphincterotomy, **21**:584
lateral internal vs. fissurectomy-midline sphincterotomy management, **23**:31
manual dilatation vs. lateral subcutaneous sphincterotomy in management, **22**:308
fistula
chronic, mucinous adenocarcinoma and, **24**:562
dual, **21**:54
quadruple, **25**:143
repair, **23**:236
treatises of (classic article), **25**:832
granular-cell tumors, perianal, **21**:413
hemorrhoidectomy, anoderm-preserving, **23**:544
imperforate
correction, **23**:306
and ectopic orifices in adult patients, **21**:633
lesions, **23**:170
complicating hematologic diseases, **23**:310
low stapled anastomosis onto, **24**:437
malignant melanoma of, **25**:693
pressure, Lord's procedure, **22**:483
reconstruction, gracilis muscle transposition, **23**:552
rectal pressures, quantitative analysis of in Hirschsprung's disease, **24**:422
retractor, cylindrical, for transanal rectal surgery, **21**:210
and rectum, diseases of (Goodsall), **25**:262
sphincter
abscess, central, precursor of anorectal abscess and fistula, **22**:336
age-related changes, scar formations, **23**:160
anastomosis by invagination to preserve function, **21**:188
anatomy, mechanism, **22**:336
artificial, **21**:562
continence, single loop, **23**:37
incontinent, repair, **21**:183
internal, fistulous abscess and fistula, cryptoglandular intermuscular, **21**:237
levator hiatus and tunnel, **22**:539
preservation by anastomosis with colon, **22**:102
pressure studies, **22**:342, 415
stricture of, anoplasty for, **25**:809
surgery of, improved technique of local anesthesia for (technical notes), **25**:259
Treitz's muscle, preservation of, in hemorrhoidectomy, **25**:633

Aorta, see under Artery(ies)
Aortic aneurysm, see under Aneurysm(s)
Aortic valve, porcine, construction of continent ileostomy using, **25**:21
Appendicitis
complications of, **24**:187, 550
granulomatous, **24**:432
pathogenesis, **24**:507
primary ileal ulceration mimicking, **24**:183
rectal examination, diagnostic significance, **22**:97
suppurative, acute, in femoral hernia, **21**:203
Appendix
adenocarcinoma, **24**:176
primary, **21**:205
superficial spreading, **23**:587
carcinoma, fecal stasis, relationship, **23**:408
(editorial), **23**:442
Crohn's disease, **21**:361; **25**:805
manifesting as cecal mass, **23**:421
histopathology of, **24**:507
intussusception with incarceration of cystadenoma, **22**:133
leiomyosarcoma of, **22**:175
malformation simulating endometriosis, **22**:262
mucocele, diagnosis and management, **22**:267, 472
spontaneous appendicocutaneous fistula, **24**:187
vermiform, carcinoma in *in situ* of, colonic adenomatosis and, **24**:482
villous adenoma of, **25**:716
Arrhythmia(s), see under Heart
Artery(ies), aortic graft replacement, sloughage of anus and lower rectum following, **21**:302
Ascending colon, see under Colon
Aspiration biopsy, see under Biopsy(ies)
Aspirin Foundation of America (announcement), **25**:250
Astronauts, metabolic waste management, **21**:450
Azathioprine, Crohn's disease, **21**:450

B

Bacon, Harry E., M.D.
as influential surgeon (presidential address), **25**:85
(in memoriam), **24**:471
Oration, **25**:16
Bacteremia, associated with lower Gastrointestinal endoscopy, **25**:131
Bangkok, carcinoma, colorectal, in hospital, **21**:352
Barium enema
extraperitoneal extravasation, **21**:435
perforations due to, **25**:305
Barium-impaction ileus, dissolution by gastrografin, **21**:430
